

Project Brief

I-80 at 2300 East

**2007 Legislative
Update**

Provided By:

Project Description: Construction, Safety Spot Improvement

This project is designed to increase safety on the I-80, 2300 East westbound on-ramp by lengthening the ramp by approximately 400 feet. The existing deteriorating pavement will be replaced and a retaining wall will be constructed on the north side of the ramp to retain the new roadway. This project is scheduled to begin construction in early 2007.

A Public Information Manager will be assigned to this project, to work with local businesses, residents and commuters during construction

**Commission
Approved
Project Budget:**
\$975-thousand

**Anticipated
Schedule:**
Construction –
Spring 2007
